eduroam (education roaming)
for Windows 7

eduroam enables you to connect to the Internet from your own device by using your MPIfG e-mail address and password at all eduroam participating institutions.

A list of all participating institutions can be found on the website: https://www.eduroam.de

For a successful configuration please follow the instructions described in the manual:

1. In the bottom menu bar click on the Wi-Fi icon and choose Open Network and Sharing Center.

2. Next, go to Manage wireless networks.

3. In the top menu bar click on Add.

4. Now select Manually create a network profile.

5. Next, enter the following:
   - Network name: eduroam
   - Security type: WPA2-Enterprise
   - Encryption type: AES

6. Then, choose Change connection settings.

https://www.eduroam.de
7. Next, click on **Settings** in **Security** tab.

8. Here you have to uncheck **Validate server certificate** and **Enable Identity Privacy** options.

   Next, click on **Configure** and uncheck **Automatically use my Windows logon name and password**.

   Finally confirm with **OK** and close the setup window.

   Now restart your PC to save changes.

   To connect to eduroam please select **eduroam** in the list of available Wi-Fi networks.

   The logon window will appear.

   To logon please use your **Institute's ID** with an attached @mpifg.de and your **Password**.

9. Now open **Advanced Settings**. Here you have to check by **Specify authentication mode** and in the drop-down menu below choose **User authentication**.

   Enjoy using!
