How to interpret this report:

All items were rated on a scale ranging from 1 ("very much") to 6 ("not at all").
The first column on the right ("Mean") shows the mean values for your course/seminar.
The total amount of questionnaires filled out by students of your class is stated on top of the report.

The second column ("SD") states the standard deviation.

The third column ("Grand Mean") shows the grand mean for the respective item for all questionnaires filled out during the evaluation of CGS seminars and courses. The questionnaires reach a total of 172.

A comparison of the first and the third column allows you to interpret your students' answers in relation to all students' answers.
